# CALIFORNIA 911 SYSTEM

CA 911 Outages		
Northern California	Central California	Southern California
No 911 Outages	No 911 Outages	No 911 Outages

**9-1-1 Outages/Remote/Community Isolations:**

- None reported.

**Service Interruptions:**

- None reported.

# WEATHER OF CONCERN

## NORTHERN CALIFORNIA

- Dry and mild weather continues for most of the region today, then rain chances increase and spread southward Wednesday.
- The upper trough is forecast to move in later Wednesday night and Thursday turning precipitation more convective and leading to a better chance of thunderstorms along with bringing lowering snow levels to the northern Sierra.
- A late-season winter storm is expected to bring significant snowfall accumulations to the higher elevations of the northern Sierra Nevada and Mt Lassen area later Wednesday night into early Friday.

## SOUTHERN CALIFORNIA

- An unseasonably cold Pacific storm system will bring a cool, wet weather pattern to Southwest California Wednesday night into Thursday. Widespread rain is likely across the area, with a chance of thunderstorms mainly north of Point Conception and over the mountains.
- Rainfall amounts are forecast to range from between 0.25 and 0.50 inches across the coasts and valleys, with up to 1 inch across the higher terrain. Local amounts in excess of 1 inch are possible under thunderstorms.

# WEATHER KEY POINTS

**05/14/19 - 05/20/19**

## Tuesday

- Dry conditions continuing for most of the state
  - Rain showers and cooler conditions will arrive in far northwest CA through the day

## Wednesday-Thursday

- Gusty winds expected across Southern Region and southern Inland Region Wednesday-Thursday.
- Rain showers and cooler conditions will spread across northern and central CA Wednesday, and into southern CA by Thursday.
  - Strong storm for mid-May with potential for heavy rainfall Wednesday for Coastal and Northern Inland Regions
  - The potential for thunderstorms and periods of heavy rainfall spreads to Inland and Southern Regions for Wednesday night and Thursday
  - Snow levels will drop to 5,000-6,000 feet by Thursday, with significant impacts to travel likely in the Sierra due to accumulating snow, gusty winds, and reduced visibility.

## Friday-Monday

- Friday will be relative break in precipitation, though some isolated to scattered showers are still possible
- Another storm system will move into the Coastal and Inland Regions Saturday, with cooler weather and showery conditions lingering into Sunday and Monday
  - Additional thunderstorms will be possible across mainly the Inland Region Saturday into Sunday
- Gusty winds will be possible across portions of Southern Region, especially on Sunday and Monday

# CALIFORNIA WEATHER IMPACTS
